

Cybersecurity Concerns in New Zealand's Healthcare Sector: Non-intrusive cyber threat assessment offer for healthcare providers

How can Fortinet's complimentary cyber threat assessment enhance cyber resilience for healthcare providers in New Zealand?

In the healthcare sector – already tackling high pressures in several other areas - cybersecurity is a paramount concern due to the severe consequences of data breaches such as phishing scams, viruses, malware-infected medical devices and DDoS attacks. These incidents have garnered significant media attention.

The uninterrupted provision of healthcare services is critical, as disruptions can have life-threatening consequences. As a result, healthcare executives are highly focused on cybersecurity to safeguard patient care. Data breaches, stemming from various cyber threats, are adversely affecting healthcare providers throughout the care continuum.

Our goal is to assist healthcare providers in New Zealand in strengthening their cyber resilience while avoiding operational disruptions. We offer a non-intrusive, complimentary cyber threat assessment programme that accomplishes the following:

- 1 Increased visibility:** The programme is designed to enhance visibility of the effectiveness of cybersecurity measures and identifies areas for improvement against evolving cyber threats.
- 2 Risk Detection:** It helps detect and mitigate risks and vulnerabilities to reinforce the operational resilience of information technology (IT), operational technology (OT) and internet of medical things (IoMT) systems.
- 3 Cybersecurity Awareness:** It elevates cybersecurity awareness amongst staff and guest users, fostering a culture of security.

Fortinet's Cyber Threat Assessment is easy to implement and yields meaningful and substantial results. Following the assessment, you will receive a risk assessment report containing our recommendations to enhance your organisation's cybersecurity posture. This report can be conveniently presented during your next board meeting. You can access a sample report [here](#).

Register your interest at <https://global.fortinet.com/apac-lp-nz-healthcare-ctap-offer> and our healthcare cybersecurity specialist will contact you as soon as possible.

We look forward to the opportunity to assist you in creating safe and secure digital patient care environments.

Please note that the terms and conditions of this offer require compliance with Fortinet's End User License Agreement (EULA), accessible at www.fortinet.com/doc/legal/EULA.pdf, for all provided Fortinet products. By participating in this promotion, you acknowledge your understanding of the EULA and your agreement to its terms. This offer is currently available exclusively in New Zealand.
